## Why Choose Nine23 as your Trusted IT Service Provider?

Nine23 has established itself as a highly competent trusted Cyber Security Solutions Company, servicing public and private sector organisations to enable end-users to use technology, securely. We have proven this through multiple service deliveries of user-focused, nationally-accredited solutions, in complex environments and by enabling some very prolific end-users.

### End-User Focused

### Experts

### Security

### UK Data Sovereign

Nine23 is, above all, a team of talented and experienced individuals who share the Nine23 mission of wanting to enable the end-user, securely. We have many years of experience in designing, building, and operating solutions and services and we work alongside your team to achieve success together. We view collaboration, and the ability to communicate with our clients and partners, as critical to our combined success.

## Government Approved Supplier

Nine23 is a government-approved supplier listed on 3 Crown Commercial Services (CCS) frameworks including G-Cloud, Digital Outcomes & Specialists (DOS) and Cyber Security Services 3 (CS3).

Nine23 provide cyber security solutions and services to enable the frontline end-users to use technology securely in today's workplace. Today's end-user expects to operate at work in the same way they do at home – consumer simplicity with enterprise security. We passionately believe that you, the customer, and end-user should be at the heart of everything we do and be empowered to use technology as you need, with confidence in the secure protection you expect.
