

FLEXContainer

BYOD - Mobile App Workspace

Secure and enhance your mobile way of working with FLEXContainer, a trusted endpoint solution delivered from our accredited private cloud - Platform FLEX to secure your network.

For more than a decade, mobile employees have been working with one hand tied behind their backs. The productivity and bottom-line benefits mobility originally brought have been cancelled out by overly-restrictive mobile security policies. FLEXContainer removes those limitations, enabling unrestricted, unimpeded, and totally secure collaboration between mobile employees and their enterprise ecosystem.

EMPOWER your workforce to stay connected & productive in a secure mobile environment.

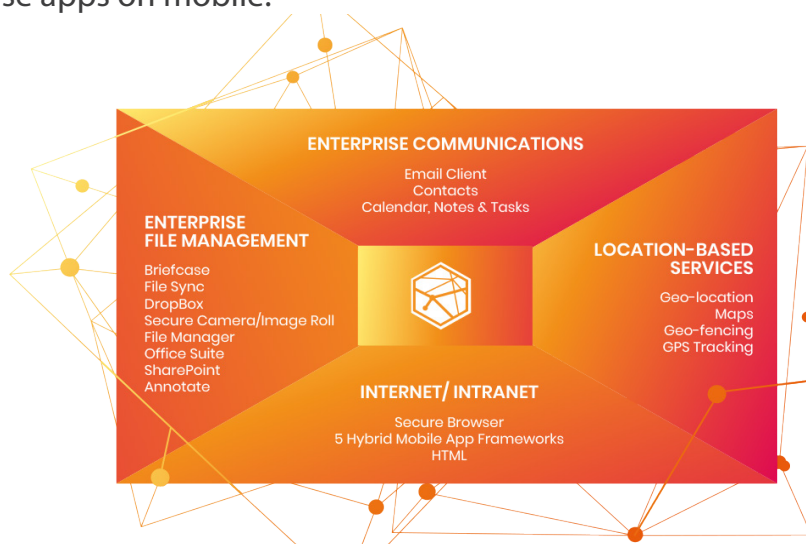

FLEXContainer is protected through a FIPS 140-2 compliant, AES 256-bit encrypted app container designed to secure data without any hindrance to application functionality. It secures data and apps on the device with a NIST-certified, AES 256-bit encrypted connection to our datacentre. For securing your mobile Office 365 or other enterprise app experience there is no more cost-effective and functional product than FLEXContainer.

“Your employees should be able to do their work from wherever they are.”

FLEXContainer comes with integration to a multitude of Enterprise Mobility Management (EMM) systems. With FLEXContainer, you get a defense-grade containerised workspace that serves as a complementary layer of security to your existing EMM investment. Your mobile app workspace is fully integrated while your network perimeter remains secure.

FLEXContainer provides your workforce with a full suite of enterprise apps on mobile:

- National Cyber Security Centre (NCSC) Personally owned, with managed container application
- Containerised, encrypted NIST-validated security
- Quick, easy deployment as managed service
- Integrated with Microsoft Intune EMM, MobileIron and more
- Simple subscription-based payment model
- Ability to easily upgrade or downgrade subscription
- Available in a free trial
- Hosted on an accredited UK data centre Platform FLEX with connections to ALI, PSN, HSCN
- Can be procured direct and using CCS

We are a Cyber Security Technology Solutions company that designs, builds and supports innovative projects involving mobile devices. We are passionate about delivering the best possible Front Line Experience and believe you should expect the same mobile technology innovations in your work as you benefit from in your personal life. We deliver ecosystems creditable to Official-Sensitive as part of our FLEX platform.
