

Partner with Nine23

Work with us

Who are Nine23?

Nine23 is a technology company focused on enabling secure technology to end-users in today's workplace by defining IT problems, building secure solutions and managing the services.

At Nine23, we have continually delivered end-user focused IT solutions as we passionately believe the end-user should be put first and empowered to use technology securely – Because today's user expects to operate at work in the same way they do in their personal life from anywhere, with any device.

What do Nine23 do?

We believe that clients expect more so we try to exceed these requirements with a complete focus on the end-user at every stage of our define, build and manage operating model.

We have learnt from experience that to deliver value, you must have the back-end operations and processes in place to complete the proposition which is why we have invested in our own fully owned UK Private Cloud Infrastructure, Platform FLEX and implemented ISO standards; 9001, 27001 (platform FLEX is in scope), 20000.

Platform FLEX is also a multi-cloud gateway with established connectivity to networks; Public Services Network (PSN), Police National Network (PNN), Health & Social Care Network (HSCN), Assured LAN (ALI) and is designed and accredited to hold data/services at Official – Sensitive.

Why partner with Nine23?

We believe that the best way to grow and to deliver a better service to the end-user is to work with other IT providers and combine experience and resources. We offer products, services and solutions and will work with you on agreeing a joint value proposition that works for every party.

We are all SC & NPPV level 3 cleared.

What can Nine23 do for you?

Platform FLEX - Private UK Hosted Cloud is the core of our proposition and enables the products and services that form our solutions.

We will work with our partners to deliver a managed service at speed and scale. You will receive clear, well-defined Service Level Agreements (SLA's) that exceed customer requirements and we work with you to fit in at any level of the service agreement.

Certifications

We are a Cyber Security Technology Solutions company that designs, builds and supports end users to use technology. We are passionate about delivering the best possible Front Line Experience and believe you should expect the same technology innovations in your work as you benefit from in your personal life. We deliver ecosystems accreditable to Official-Sensitive as part of our secure cloud FLEX platform.
