

Solutions & Services

What we provide

At Nine23 we provide Cyber Security solutions & services ranging from large-scale adoptions of digital transformation to self-contained advisory packages within existing projects that encompass technical architecture, information assurance (IA) and above all the end-user experience. Our services are underpinned by a mature and accredited private cloud platform FLEX that delivers the benefits of cyber security and enables the End-user. The network connectivity and gateway services to other public cloud and secure networks are already in place and certified.

We offer many elements of the digital transformation journey and all our services can be used in a modular way. Above all our services are about enabling the end-user. Our operating model links our operations with the customer's journey to deliver continual improvement and value to the customer.

Private Cloud – Platform FLEX

Platform FLEX, a UK private cloud fully, managed Nine23, owned infrastructure platform, enables the end-user to function more effectively and productivity in the field; accessing, sending and sharing data as needed, without having to return to base for reporting or admin.

Managed Services

Nine23 can provide full managed service for those customers that would rather have experts securely managing and supporting their IT requirements, or escalated support to complement and enhance existing IT departments.

- Fully Managed IT Service
- Complimentary IT Service
- Business Continuity (BC)
- Disaster Recovery as a Service (DR)
- Cyber Security as a Service (CSaaS)

Cyber Security as a Service (CSaaS)

Nine23 have a number of services to help you gain Cyber Essentials (CE) certification and then manage this level of cyber security for you. A consultancy approach in the first instance to understand your current position followed by either a report on what you should be fixing in your environment and/or a fully managed Cyber Secure as a Service (CSaaS) where we maintain your cyber security for you as a continued service.

Cloud Services

- Secure Hosted Private Cloud
- Multi Cloud Hosting
- Secure Application Hosting
- Public Cloud Hosting (AWS, Azure)

Migration Services

- Cloud Migration
- PSN Migration
- UEM / EMM Migration
- Intune migration tool

Advisory Services

- Project Management (PM)
- Professional services
- User requirement analysis
- Digital transformation

FLEXContainer App (BYOD)

Secure and enhance your mobile way of working with FLEXContainer; a trusted endpoint BYOD solution delivered from our accredited private cloud – Platform FLEX to secure your network as per NCSC guidance “Personally owned, with managed container application”.

Gateway Services

Nine23's owned and fully managed enterprise infrastructure, gateway service accredited (NCSC/GPG) to OFFICIAL-SENSITIVE providing secure connection to government networks from any device or service. Mobile-tablet-laptop devices, hosted applications and services, can connect securely with government services-networks, such as PSN/RLI/PNN/PND/HSCN over standard internet/corporate/PSN-Police connections.

We are a Cyber Security Technology Solutions company that designs, builds and supports end users to use technology. We are passionate about delivering the best possible Front Line Experience and believe you should expect the same technology innovations in your work as you benefit from in your personal life. We deliver ecosystems creditable to Official-Sensitive as part of our secure cloud FLEX platform.
